DON'T BE

Don't be fooled by outrageous claims. Torque is the true measure of performance. aFe products are engineered and matched to produce maximum torque over all others!

2007.5-10 GM LMM

\$729

Stage 2 intake

Huge 360° air filter, one piece housing with diamond plate top and a tuned intake tube which outflows the factory intake system by 60%.

**18 hp
51 lbs.
Torque**

DPF-Back Exhaust

4" High Flow 409 stainless steel system outflows the factory exhaust by 126% for increased performance and lower EGT's. System is finished with a double wall 304 polished stainless steel tip.

2006-07 GM LLY/LBZ

\$749

Stage 2 intake

Huge 360° air filter, one piece housing with diamond plate top and a tuned intake tube which outflows the factory intake system by 71%.

**9 hp
19 lbs.
Torque**

Turbo Back Exhaust

4" High Flow 409 stainless steel system outflows the factory exhaust by 80% for increased performance and lowers EGT's.

Huge 6" black powder coated exhaust tip included with each package FREE!

DENSE!

2004.5-05 GM LLY

\$749

Stage 2 intake

Huge 360° air filter, one piece housing with diamond plate top and a tuned intake tube which outflows the factory intake system by 42%.

**17 hp
39 lbs.
Torque**

Turbo Back Exhaust

4" High Flow 409 stainless steel system outflows the factory exhaust by 80% for increased performance and lowers EGT's.

2001-04 GM LB7

\$749

Stage 2 intake

One-piece housing, tuned intake tube and large 360° air filter with expanded metal for maximum strength and increases airflow by 42% over the factory intake system.

**17 hp
39 lbs.
Torque**

Turbo Back Exhaust

4" High Flow 409 stainless steel system outflows the factory exhaust by 80% for increased performance and lowers EGT's.

Prolong Fast Fuel Diesel Fuel Treatment

Prolong Super Lubricants offers its Fast Fuel Diesel Fuel Treatment to improve mileage and performance in diesel engines. Prolong states its Diesel Fuel Treatment is formulated with premium detergents that clean injectors and the entire fuel system by removing gum, deposits and sludge buildup to deliver better fuel economy and decrease the amount of black smoke. The formula meets Cummins L-10 diesel-fuel additive specifications for injector cleanliness and Cummins N-14 diesel fuel additive specifications for corrosion protection with low and high sulfur levels.

In addition, Prolong says the product helps maintain diesel-emission compliance and protect against corrosion and premature pump and injector wear. For more information, call (800) 540-5823 or visit www.prolong.com.

Fastkap Retractable Dodge Truck Canopies

Fastkap Retractable truck canopies recently introduced coverage for Dodge Ram models from 1994-'10. Fastkap Retractable truck canopies offer full cab height truck-bed coverage like a conventional hard shell, yet can retract in seconds behind the truck cab for full use of the truck's cargo area. The canopies are made from Seamark marine grade fabric, providing a 100-percent waterproof cover wrapped around a powder-coated steel framework. The canopy rides on the included stainless steel bed rails, which install with no drilling onto the truck bed rails. For more information, call (877) 708-8548 or visit www.fastkap.com.

Godfather Customs' Billet Grille

Godfather Customs is offering a twist on the already-popular classic billet grille. The all-new Precision Grille All-Black-series billet grille is made from the finest 6061 aircraft-grade aluminum and is handcrafted for a right fit. Precision Grille has enhanced its popular grille design with a specially formulated "black" powder coat, giving each application the timeless upgrade of a billet grille with a new finish. For the full lineup of fitments, call 800.231.1101 or visit www.gcustoms.com.

Duramax aFe Pro Guard D2 Performance Fuel Filter

Just released from advanced Flow engineering (aFe) is a new Pro Guard D2 performance fuel filter for the 2001-'10 Duramax. The Pro Guard D2 performance fuel filter provides maximum protection and flow for your Duramax. It exceeds the new GM specifications with a 4-micron rating and uses a 3/8-8 center thread with a maximum working pressure of 30 psi, with a maximum flow rate of 50 gph, according to aFe. For more information, call 951.493.7155 or visit www.afepower.com. **DW**
