SPEED GEAR

TAKEDA USA ATTACK COLD AIR INTAKE

The new Takeda Attack cold air intake is a true cold air intake design replacing the factory intake and locating the high flow air filter away from hot engine compartment air increasing air volume and improving air velocity for increased horsepower, torque and improved throttle response. Utilizing a specially designed 2-piece wrinkle black powdercoated aluminum intake tubes to guide the air into the motor and provide an aggressive style. Takeda air intakes use the brand new Pro Dry S filter from aFe, which uses a progressive synthetic media, requiring no oil to recharge for maximum convenience and filtration. The Pro Dry S filter is 99.2% efficient so it prevents all of the dirt and debris from entering the motor. TA-6002B comes complete with wrinkle black aluminum tube, Pro Dry S performance air filter, pre-filters, urethane couplers, clamps and all hardware necessary for a simple installation. In recent testing, part number TA-6002B produced 7hp and 8lbs. x ft. of torque and out flowed the factory intake by 97%. For more call (951) 493-7155 or visit www.takedausa.com

ENKEI RPF1 T-SHIRT

The Enkei RPF1 is one of the most sought after and popular wheels in the industry. It only makes sense it is the first to get it's very own t-shirt! If you are a fan of the RPF1 or a car enthusiast in general, make sure you order your Enkei RPF1 T-shirt today. Made from 100% cotton, these black tagless t-shirts are available in various sizes from small to XXL. With free shipping and limited quantities available, they're sure to go fast. Order yours at www.enkei.com or on blog.enkei.com

KELFORD CAMSHAFTS

Kelford Cams announces their new line of Honda K Series camshafts. The newest addition being Kelford's K20/24 turbocharger camshafts, with low overlap and high response. Since early 1990's Kelford Cams has recognized the growing worldwide demand for high performance valve train products to suit Japanese and European multi valve engines. Their specialist knowledge, modern CNC grinding equipment and innovative design systems have helped them become a world leader in the camshaft market. These products and more are available at Motovicity Distribution. For more call (888) SPEED-16, visit www.motovicity.com or check out www.kelfordcams.com

BLITZ UPGRADE ACTUATOR

The Blitz upgrade actuator helps maximize turbo performance by dramatically stabilizing boost levels, especially during high RPM conditions. Equipped with a threaded turnbuckle, adjustments in boost level can be performed without removing the unit. A machined anodized blue aluminum housing with stainless steel actuator rod and chrome plated steel bracket provide high resistance to corrosion and durability, as well as a striking appearance. For more visit www.blitzpowerusa.com or www.optionsauto.com/blitz
