THE RIGHT HARDWARE FOR YOUR HAULER

## street trucks

### ① U.S. PRODUCTS DRIMASTER

U.S. Products introduces "jetless" cleaning for auto fabrics and upholstery. The DriMaster does not oversaturate or over-spray fabrics, leaving them 50 percent drier than conventional upholstery tools.

Durable, lightweight, ergonomically designed, and with no trigger valve, the DriMaster helps minimize wrist and hand strain. And the low profile allows it to be used in hard to reach spots throughout your customers' cars. The DriMaster is also cool to the touch, so it can be used with U.S. Products' hot water extractors for greater cleaning efficiency.

### ② MODULAR OIL FILLERS

These uniquely designed modular fillers may be installed in nearly any valve cover configuration without the need to weld in place. This design allows the installer to select the most desirable location for their particular application. Once identified, the bore hole is drilled and the bung is installed with a threaded retaining ring held in place with a set screw. The set includes O-rings for the bung and the threaded cap to prevent seepage and oil loss. There is no need to repolish, reanodize or repaint the valve covers, which is a significant cost savings. Each of these billet fillers are easily installed and are available in black, silver, red or blue anodized finishes, including PRW Threadlocker.

### ③ AFE FULL METAL AIR INTAKE FOR 2007.5-10 GM DURAMAX LMM V-8 6.6L

advanced FLOW engineering (aFe Power), an industry leader in performance intakes, filters, manifolds and exhaust systems, is pleased to announce the release of its Full Metal Power air intake system for the popular 2007.5-10 GM Duramax LMM V-8-6.6L (P/N F1-04004).

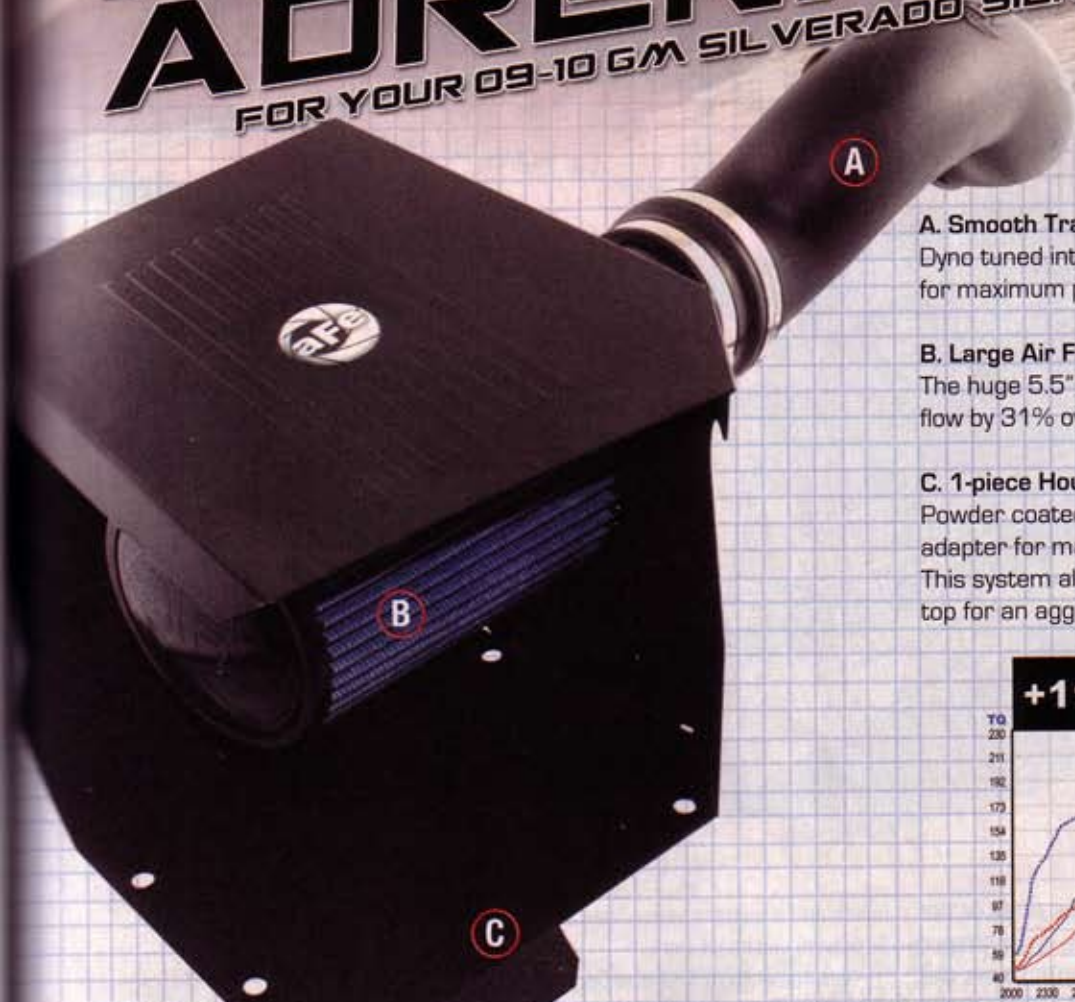

The F1-04004 represents a new technology in metal tube intake design available for the Duramax LMM. This cold air intake system utilizes a specially designed, 5-inch reverse step, gunmetal gray anodized aluminum tube that is designed to maximize air velocity and improve horsepower, torque, mpg and throttle response. This system comes complete with the one-piece black powder coated heat shield and intake tube and is finished with the PRO Dry S performance air filter that requires no oil for maximum convenience.

# ENGINEERED ADRENALINE

FOR YOUR 09-10 GM SILVERADO SIERRA GMT 900

**A. Smooth Transitions Intake Tube:**

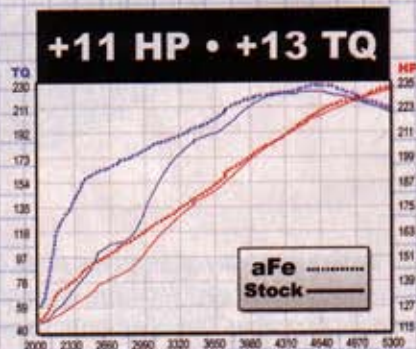

Dyno tuned intake tube increases air velocity for maximum performance.

**B. Large Air Filter:**

The huge 5.5" 360° air filter increases air flow by 31% over the factory intake.

**C. 1-piece Housing:**

Powder coated steel housing and 3 angle adapter for maximum strength and air flow. This system also has a black powder coated top for an aggressive style.
